

ANNUAL REVIEW OF INJURY SURVEILLANCE RESEARCH IN RUGBY UNION

METHOD

Injury Definition: Match Injuries incurring >24 hours' time-loss

Match Injury (Concussion) incidence
Outcome = Number of injuries, offset by number of exposure hours (# matches)

Match Injury (Concussion) severity
Outcome = Mean number of days absent per injury

Weighted by standard error of mean injury severity (i.e., larger datasets have more say in overall estimate)

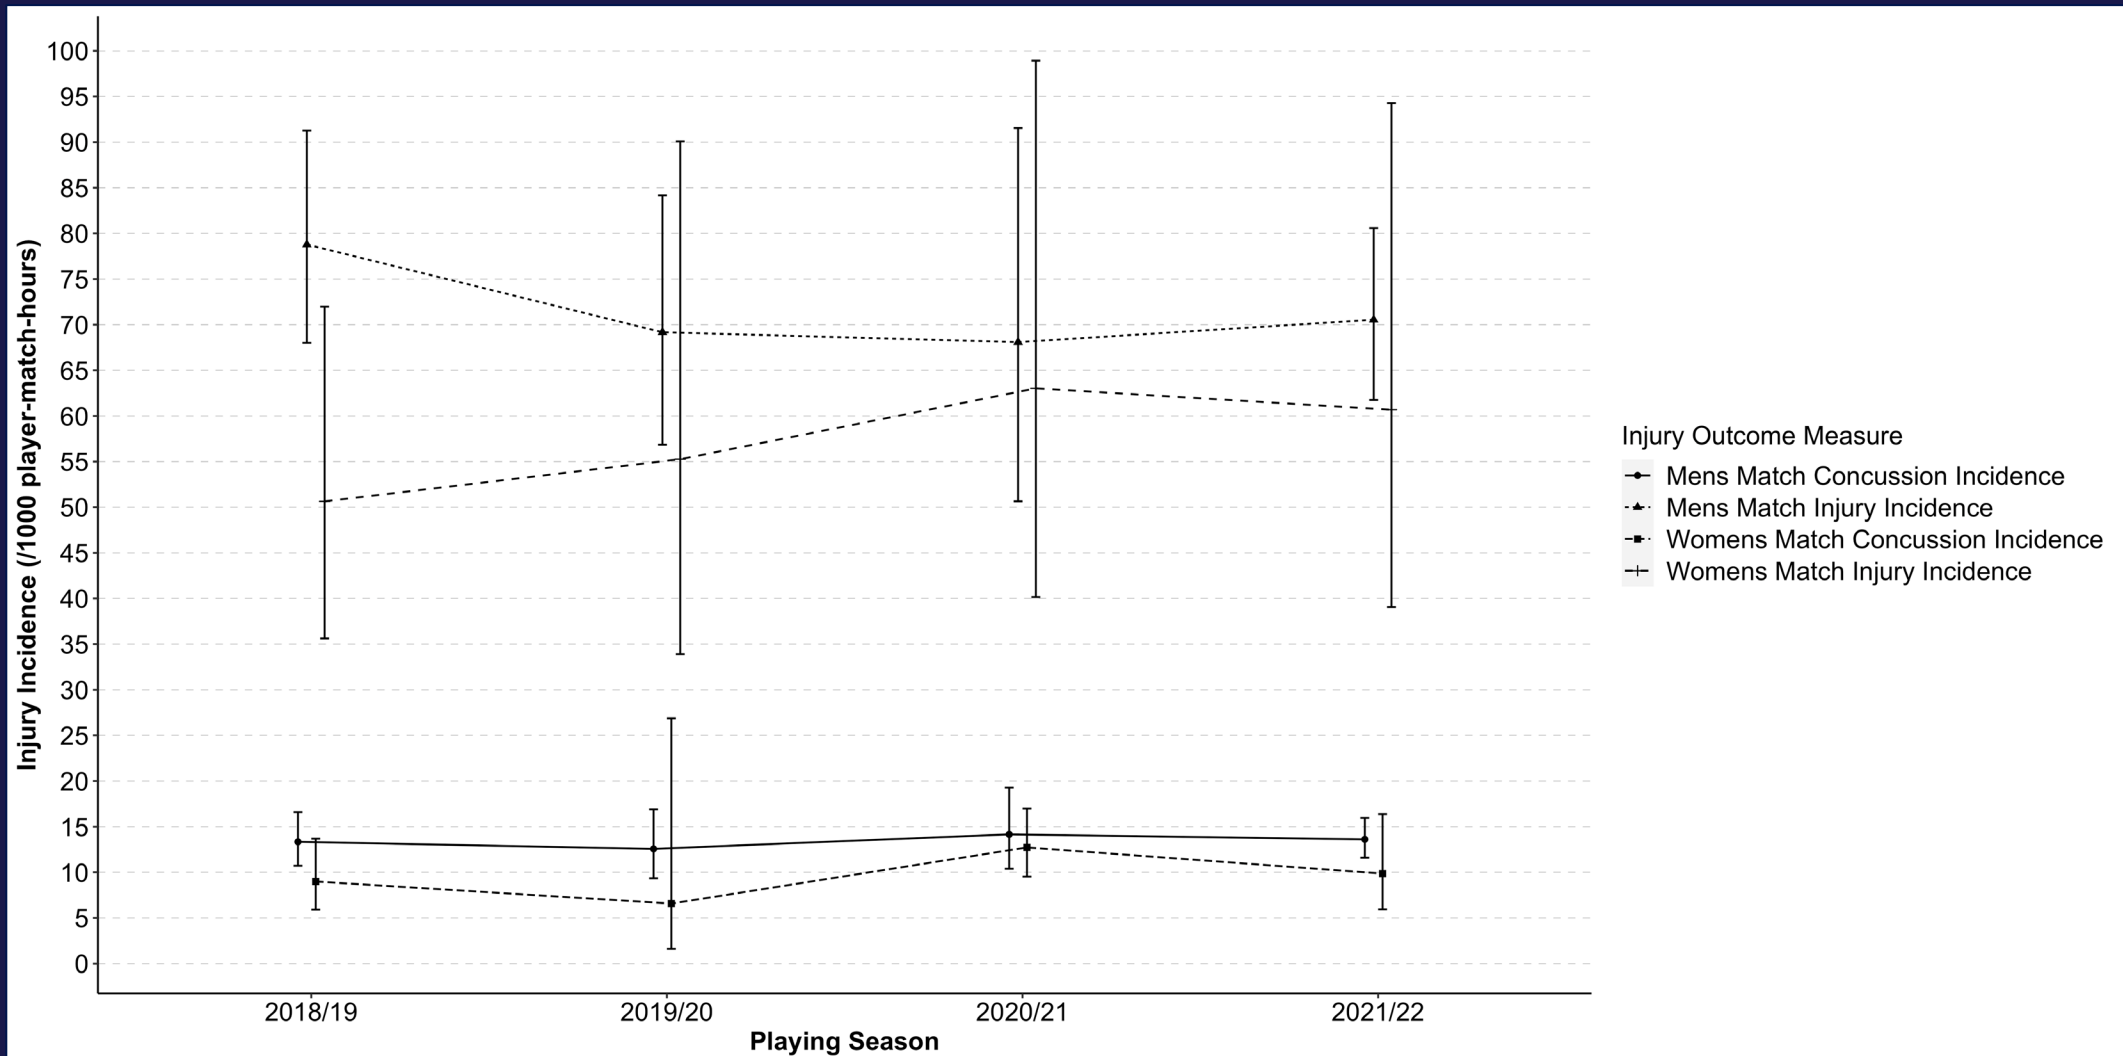

DATASET SUMMARY

Competitions taking place in 2021/22 or 2022 playing season

	Setting	Number of Competitions	Match Exposure hours	Match Injuries	Match Concussions	Days lost to match injuries	Days lost to match concussion
Men	International – Senior	5	2 520	202	38	6 543	635
	International – Junior	2	1 160	68	10	3 184	158
	Domestic – High Performance	8	40 221	2 386	547	64 925	6 920
	Domestic – Performance	2	5 400	333	81	7 089	1 215
Women	International – Senior	2	1 640	86	9	4 729	243
	Domestic – High Performance	2	3 960	180	55	6 855	1 530

* Severity data unavailable for some competitions

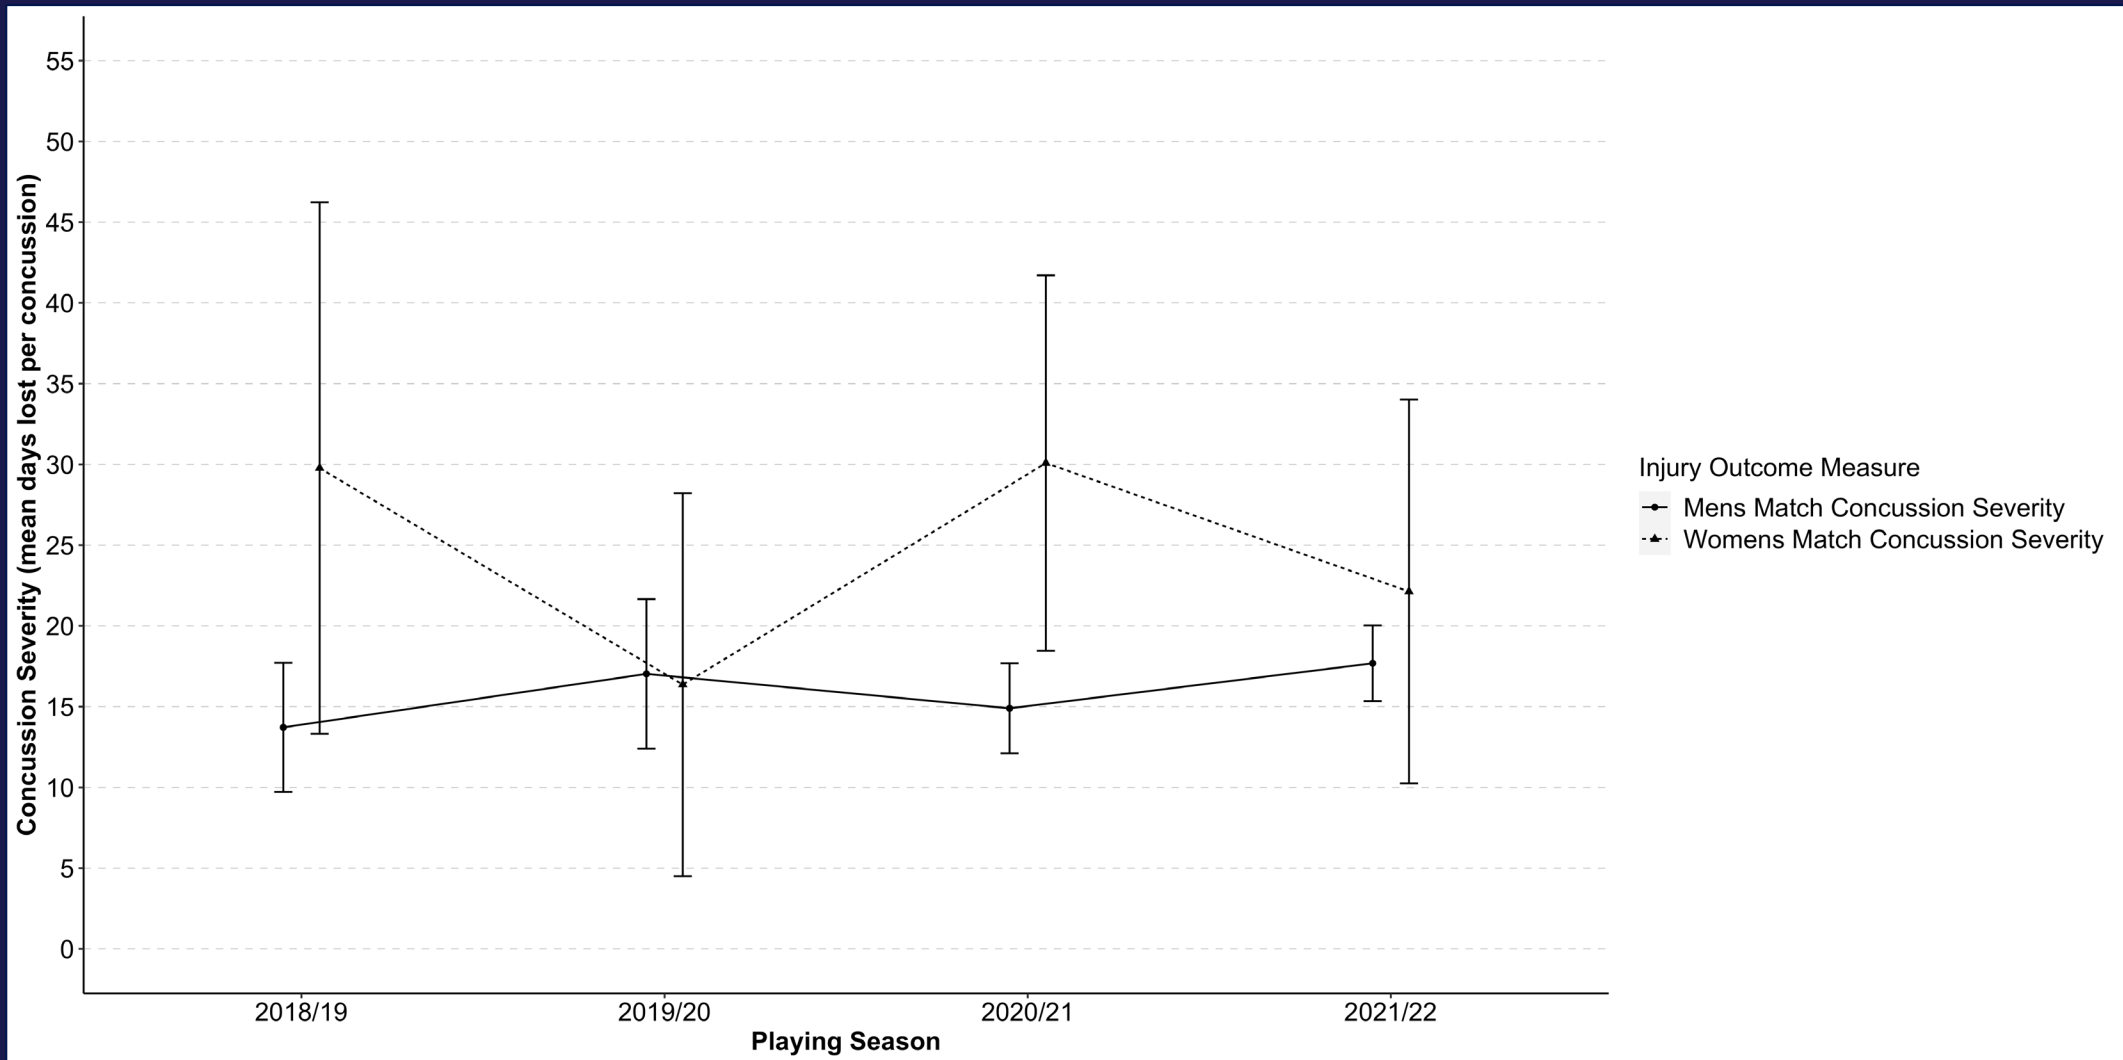

MATCH INJURY / CONCUSSION INCIDENCE

MATCH INJURY SEVERITY

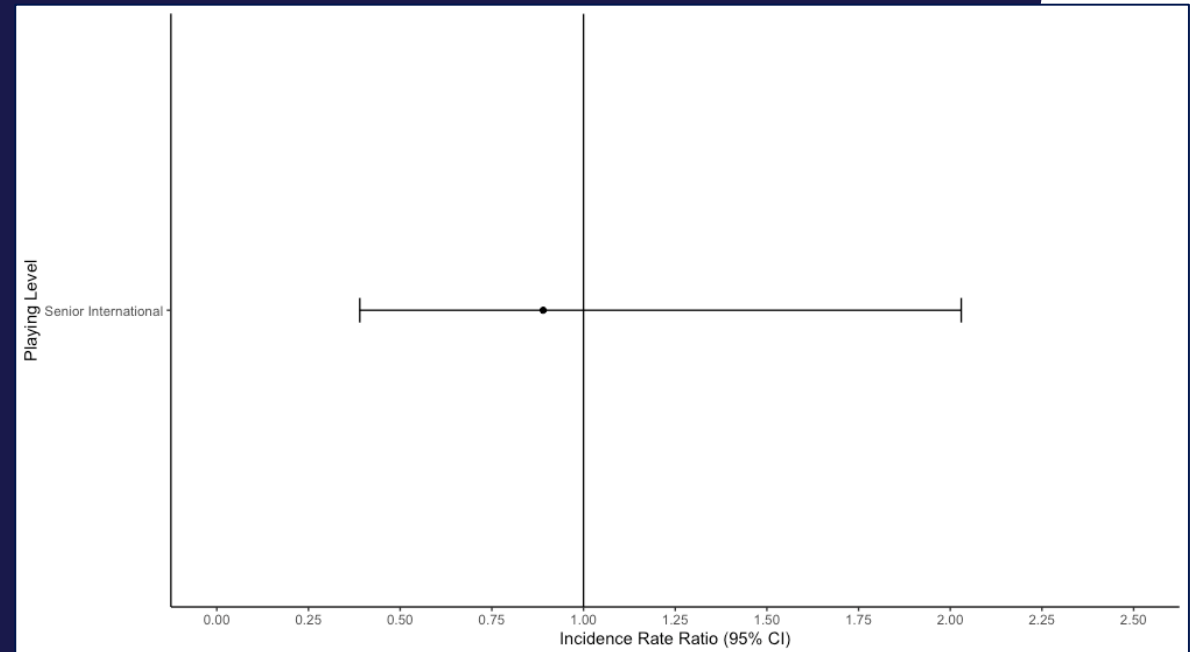

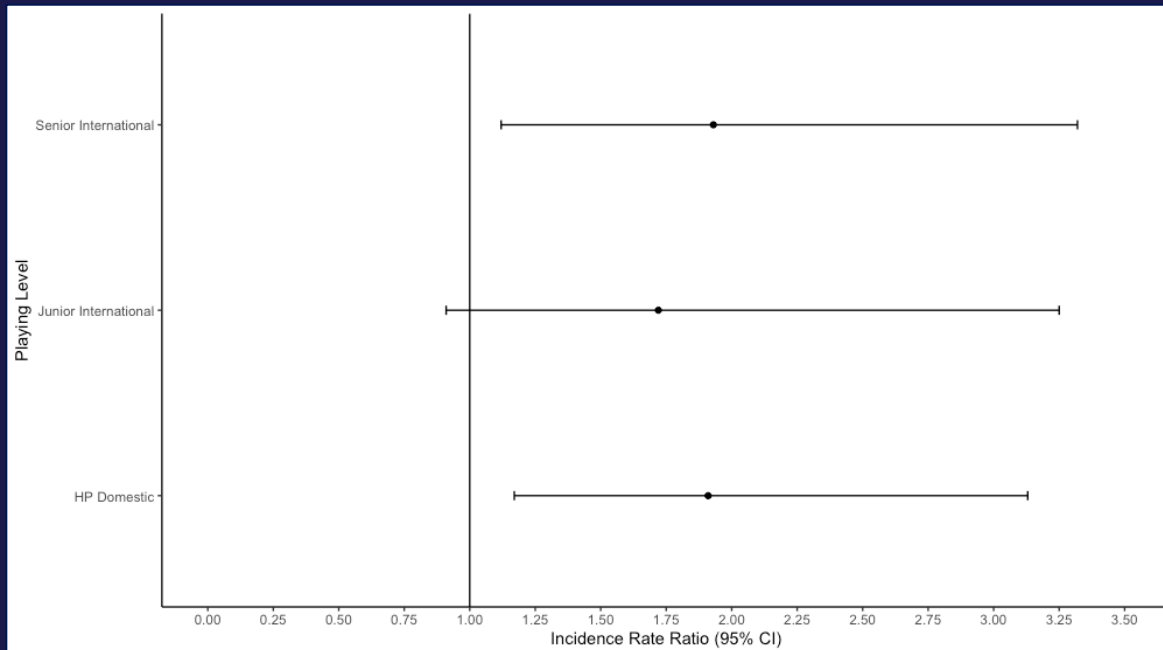

MATCH CONCUSSION SEVERITY

MATCH INJURY – EFFECT OF PLAYING LEVEL

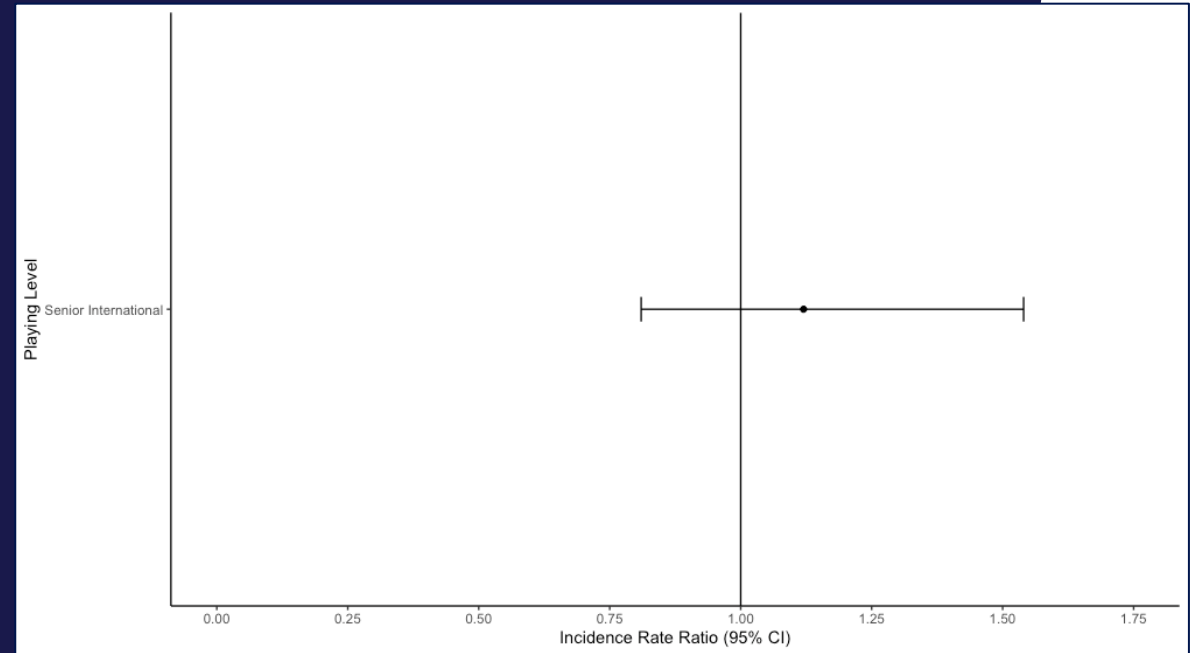

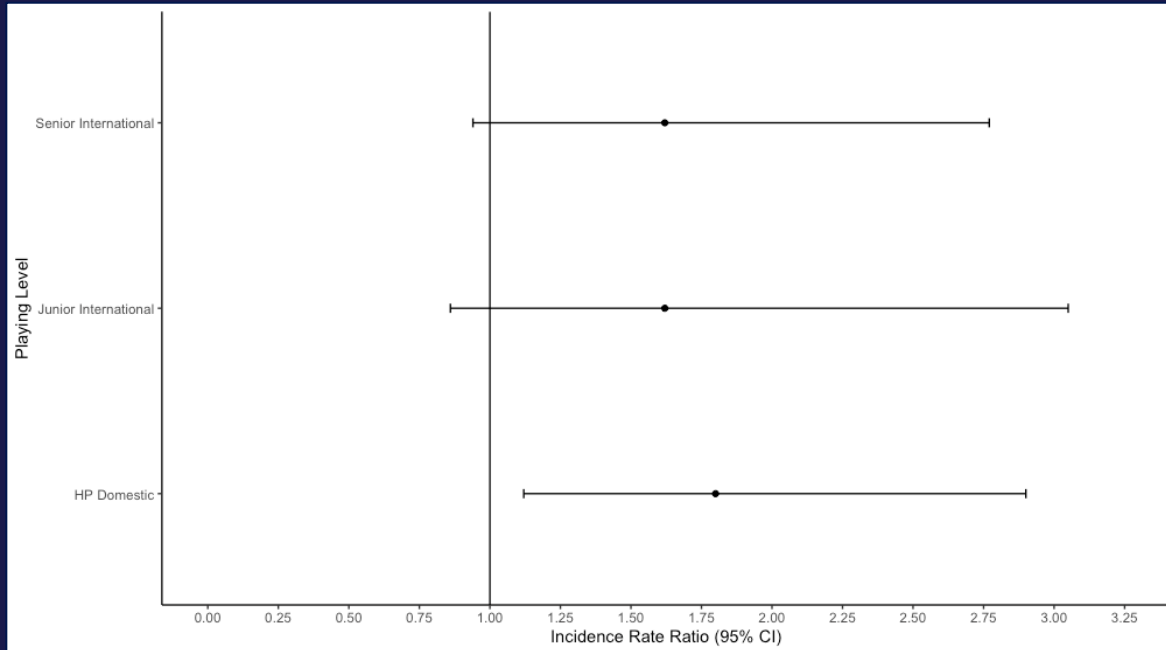

Mens Competitions 2018/19 – 2021/22

Womens Competitions 2018/19 – 2021/22

MATCH CONCUSSION – EFFECT OF PLAYING LEVEL

Mens Competitions 2018/19 – 2021/22

Womens Competitions 2018/19 – 2021/22
